

Plan 2021/22

Maintenance

This year we will need to focus on maintenance around the site.

We are collating priorities and obtaining quotes and we will make a plan for maintenance work to be carried out for the remainder of this year and next year.

Our first priority is to begin looking at the trees that are overhanging plots along the site boundary and causing problems. We have undertaken a survey and will take this work forward over the next two years.

Roadway – the Montenotte gate and Wood Vale roadways both need significant work. We will obtain quotes and look to see how we can make improvements.

Fencing – on going renewal and upgrading of fencing to improve security of the boundary.

Investigate the possibility of installing a composting toilet. Particularly important if we are going to run workshops in the Barn.

Assess what repairs are needed to ensure the structural integrity and safety of the trading shed.

Barn

We will be planning more activities to be held in the Barn and hope that by next Spring/Summer we will have many and varied activities taking place. We are very keen to have more involvement from the allotment community in both coming forward with ideas as well as running activities. Contact the Committee on info@shepherdshillallotments.co.uk
